PROMISE

THE HYDROCORP PROMISE

HydroCorp is The Safe Water Authority.™

It is our duty to provide the most precise and comprehensive technical services in the industry. It also means delivering those services with expert knowledge, professionalism, and sensitivity to budgets and schedules – the highest standard of water safety oversight, combined with the highest value.

THE RESULT Your water system is compliant. Your risk and exposure are reduced. Your water – and your people – are protected.

SERVICE

SERVICES OVERVIEW

Cross-Connection Control

Backflow contamination poses a direct threat to human health, as well as significant financial liabilities. And these risks are seldom covered by insurance. HydroCorp optimizes cross-connection control programs while minimizing costs, frequently resulting in a comprehensive plan addressing all cross connection risks.

Surveys and Inspections

A comprehensive HydroCorp cross-connection control survey includes:

- A complete review of your facilities for both existing and potential cross-connections
- Verification of proper installation of backflow prevention devices
- Development of complete potable water piping diagrams and/or process drawings

Water System Compliance Audits

Compliance audits can help avert potentially costly claims and penalties, and may positively impact your insurance rates. HydroCorp technicians quickly identify instances of potential hazard, and document the most effective actions to bring your facility into local, state and federal compliance.

Water Quality Sampling, Analysis and Reporting

HydroCorp assists companies of all sizes and from different industry sectors with corporate programs for potable water protection.

- OSHA 1910.141 Compliance
- Water Distribution Flow and Quality Studies
- Legionella Risk Assessment and Management
- Stage-2 DBPR Compliance Monitoring & Sampling

SERVICE

SERVICES OVERVIEW (CONT.)

Device Testing Management Programs

Providing backflow prevention assembly (BPA) testing in a cost-effective manner, our trained technicians can even accommodate the special needs of high-volume and specialty customers, with minimal inconvenience to residential customers.

Process Piping System Drawings / Mapping

HydroCorp can provide authoritative, accurate piping system drawing and mapping services for your entire facility, including potable water, steam, coolant, process supply, and waste lines. These provide the basis for effective cross-connection control, and for any updates needed as your facility evolves.

High-Hazard Facility Services

We help municipal clients identify and prevent contamination from high-hazard facilities, providing the documentation and corrective action plans that result in facility compliance.

Water Meter Change-Out Programs

Communities that develop and implement change-out programs benefit from HydroCorp's expertise in containing costs, maximizing resources and systematizing replacement procedures. Our field staff can also coordinate access with homeowners and track program progress,

Training Services

HydroCorp's highly experienced instructors provide comprehensive training in cross-connection control and backflow prevention. We offer purpose-suited training programs to companies of all sizes throughout North America, both through in-person instruction and via secure web-based remote learning sessions.
