

Ozone Laundry Solution Provider

SAVINGS

85% HOT WATER/ENERGY

35% TOTAL WATER

30% ELECTRICITY

**20% LABOR
EFFICIENCY**

11% LINEN

Now is the time to install an energy-efficient EcoTex Advanced Laundry Oxidation System, and here's why.....

The average 150 room hotel can save \$25K yearly and dramatically cut monthly laundry expenses.

As soon as you install your EcoTex on-premise ozone laundry system, the savings begin. EcoTex uses cold water for effective performance, reducing hot water requirements (natural gas savings), water/sewer, electricity, and operating time for greater labor efficiency.

Some utility programs can cover up to half the cost of an EcoTex system

Huge financial incentives are available from some local utility companies when you install an EcoTex ozone laundry system. In some cases, the system is virtually FREE. NO CAP-X, only a monthly payment equaling a fraction of what you're saving.

Superior linen wash quality

The EcoTex system provides exceptional linen life over traditional cycles due to the reduction of hot water, washer agitation, and drying times that can be detrimental to linen, providing brighter, softer, and fresher smelling results.
